Your Vedic birth ascendant is Capricorn and your Moon sign (Rashi) is Sagittarius. In addition to this your birth star (Nakshatra) is Moola with first phase.

Before going through the analytical report it is of great importance to understand the basic nature of various planets in your birth chart. I have classified the planets in your birth chart in the following manner:

- **Benefic Planets:** Moon, Mars, Mercury, Venus and Saturn
- **Malefic Planets:** Sun, Jupiter, Rahu and Ketu

Present Main Period:

Presently you are passing through the main period of Rahu. Its main period has been in operation from 5th May 2010 and would last till 5th May 2028. Rahu is a malefic planet and creates illusions. Its influence is likely to make you somewhat over confident during its main period and you might underestimate circumstances or people around you.

Rahu is placed in the house governing spouse, marriage, partnerships etc. in your birth chart. It is influencing the houses representing aims, efforts, health, income, gain, desires etc. Its influence might result in some problems in enjoying the above-mentioned traits to their full strength during its sub period. For example

you might suffer on account of health, personal life or your efforts might not produce desired results.

An element of dissatisfaction from your income would prevail in your mind. Offers for entering in new ventures as well as further improving your income may come from time to time but you have remain careful since the offers they are likely to have some or the other catch in them. This is also possible that the promises made to you might not be kept or you would encounter difficulties in proving your abilities.

The analysis indicates that you should pay due attention towards your health and matters pertaining to your personal life. Work hard on professional front and avoid entering in new ventures. Above all prudence has to be exercised before taking any important decision and let this main period pass. Notwithstanding the above the sub periods of benefic planets would act as balancing factors to great extent.

The Operating Sub Period/s during Next One Year:

You would be passing through the sub period of Jupiter in the main period of Rahu from 1st January 2013 to 31st December 2013. Jupiter represents efforts, unforeseen expenses, losses, expenses on health, foreign, conjugal bliss etc. in your birth chart. In addition to this it is the natural significator of wealth, knowledge, children, husband etc.

Jupiter is weak in strength in your birth chart. Its natal weakness usually results in health problems or rise in expenses. There might be problem to/ from children, troubles in foreign stay or difficulties in enjoying marital bliss. Therefore you should due pay attention towards your health, personal life and keep expenses under control. It would be further beneficial to observe precautions in the matters relating to foreign land and let this sub period pass.

Despite of the above natal weakness of the planet signifying social standing and the higher ups might lead to dissatisfaction from your social standing, differences with superiors or difficulties in enjoying desired favours from them.
